- **Leírás**

A hókotrós játékos két Dragon fejet próbál venni egy hókotróhoz, de mivel minden fejből csak 1-et lehet venni, ezért az inventory-jába csak egy kerül, és a pénze megmarad (4), amivel a másik fejet vette volna.

8.2.19 Winners

- **Leírás**

Egy teljes játék lejátszásának tesztje, végén a nyertesek kiírása. A játékot két-két hókotrós és buszos játékos játssza. Mindkét játékos típusból csak az egyik végez tényleges lépéseket, a másik át van ugorva (next-player). A buszos játékos a 3 kör alatt egy teljes kört tesz meg a megállói között, ezért 1 ponttal zárja a játékot, így ő nyer a másik buszos játékoshoz képest. A hókotrós

játékos 3 mezőt takarít le (lowsnow - brush fejjel, ice - dragon fejjel, highsnow - broom fejjel) ezért 3 ponttal ő nyer a hókotrós játékosok között.
